More than an urban club.

LIFE CENTER  
The Power to Age Beautifully

*Chau*

The doctor of the future will give no medicine,  
but will interest his patients in the case of the humanframe, in diet,  
and in the cause and prevention of disease.

- By Thomas A. Edison (1847~1931)

# CHAUM's Differentiation

- 1. Private VIP Medical Checkup in Private VIP Room called HIVE**  
Providing extra privacy and efficiency to make you feel comfortable during your checkups

PAP smear, Mammography, Breast Ultrasound, Pelvis Ultrasound

Female Only ₩975,000

# Anti-Aging Checkup

Measure your biological age by evaluating your mineral balance, metabolism system and immunity related to aging process.

popular

## Anti-Aging Checkup Programs (1hr)

You'll be tested in different health test categories including the functions of your brain, the cells, metabolism, hormone, immune system and the autonomic nerve system. With these extensive tests, the Chaum medical specialists will address potential threats to your health and check your aging progress, to provide you with a one-on-one custom health care program to keep you healthy.

<b>Consultation</b>	Before and After Check-up
<b>Basic</b>	Physical Measurement and Obesity Index, Blood pressure, Urine Test
<b>Blood</b>	Complete Blood Cell Count(White Blood Cell,Red Blood Cell), Lipid tests, Liver function test, Diabetes Tests, Antioxidant State & Oxidative Stress Exam
<b>Respiratory test</b>	Chest X-Ray
<b>Cardiovascular test</b>	EKG
<b>DNA</b>	HRV Exam, Urine Organic Acid test, Hair Tissue Mineral Test, Saliva Hormone Exam, TELOMERE Gene Test
<b>Immune</b>	Natural Killer Cells Activity Test
<b>Body and Musculoskeletal Function Tests</b>	Body and Musculoskeletal Function Tests
<b>M ₩1,680,000   F ₩1,700,000</b>	

1. HRV Exam : Evaluation of functional regulation of the autonomic nervous system by measuring heart rate variability.
2. Urine Organic Acid Test : Evaluation of the human body energy metabolism, detoxification function and proliferation of pathogens (bacteria, fungi).
3. Hair Tissue Mineral Test : Evaluation of accumulated heavy metals in the body and nutrient mineral imbalances by hair tissue analysis.
4. Hormone Exam : Evaluation of imbalance for homocystein, growth hormones, sex hormones, adrenal hormones, pancreatic hormones and thyroid hormone tests.
5. TELOMERE Gene test : Evaluation of the health and aging of cells through the measurement of Telomere gene length which is an index for the health and aging.

# DNA Analysis

Cham provides a personalized healthcare services that can detect individual's disease.

## Complete Health DNA Testing

This test tells you a genetic nutrition and exercise profile that tells you how you may react to specific types of food and exercise, and provides insights into how your body may process sugars, fats, nutrients and vitamins.

This may help people with : Weight management, Increased mental and physical performance, Maximizing energy and Disease prevention

Collecting mucous membrane of oral cavity

₩750,000~₩3,000,000

## Disease Prognostic DNA Testing

This test informs individual's disease risks based on their genetic marker. This service provides diverse and beneficial information regarding not only various diseases such as cancers, common disease, but also food, drug response, physical traits, and rare disease carrier status by using reliable DNA markers.

This may help people with : Risk management to prevent high-risk disease

Collecting blood sample

₩750,000~₩3,000,000

## Skin DNA Testing

This test is a revolutionary DNA laboratory test that examines 16 genetic markers (SNPs) in 5 categories associated with skin aging ; Firmness(Elasticity), Wrinkling, Sun Damage (Pigmentation), Free Radical Damage, Sensitivity(Inflammation)

This may help people with : Using the right skincare ingredients

Collecting cheek swab sample

₩450,000

# Better health, Better beauty

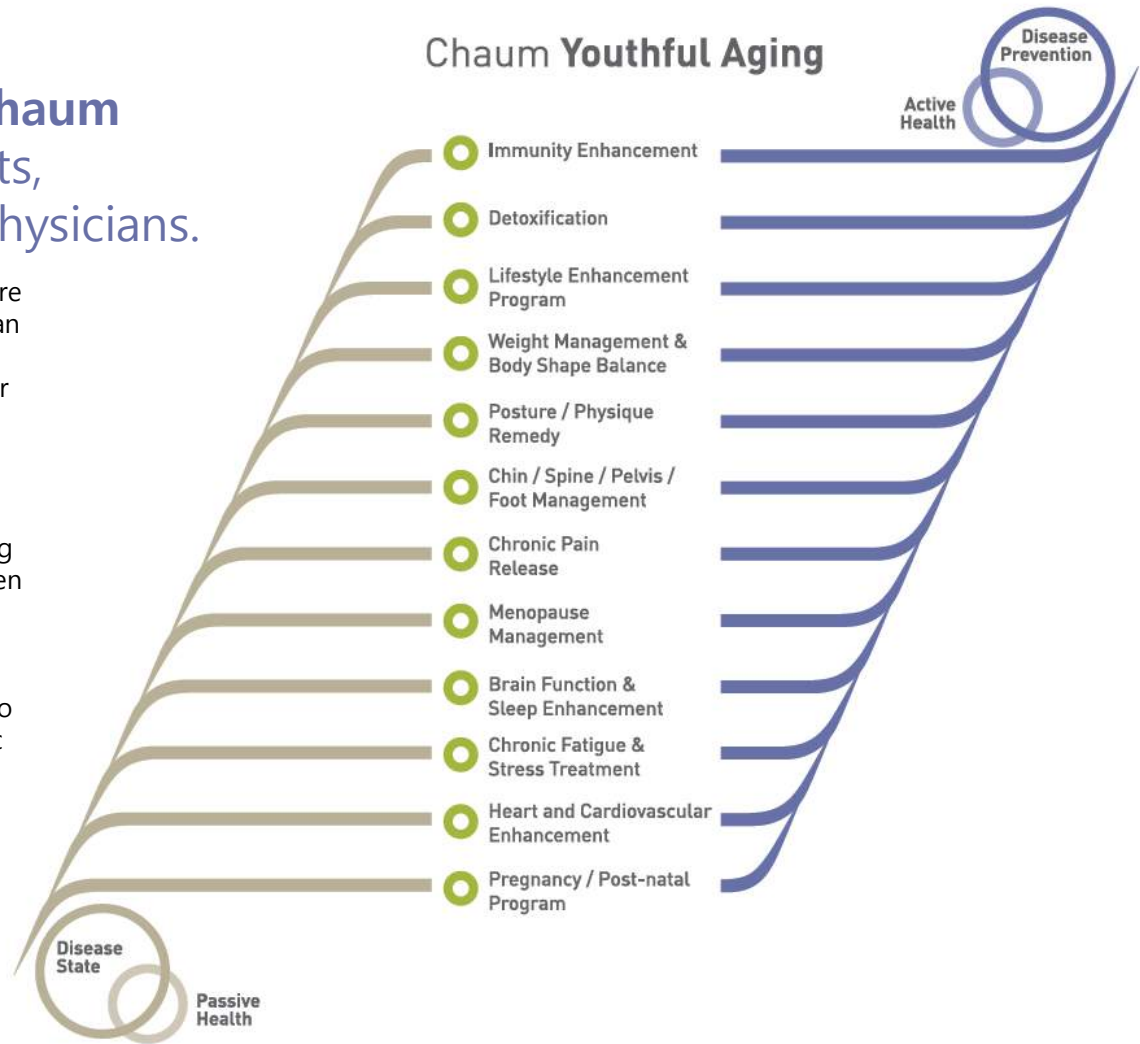

## The Anti-Aging Life Center Chaum

With 14 outpatient departments,  
11 specialized center and 40 physicians.

Thomas Edison once predicted that doctors of the future would not merely treat disease. They would actively manage their patient's health. Chaum is a Life Center, designed to give you the power to age beautifully.

Chaum begins with the most thorough and unique diagnostic review. Advanced scanning, cellular testing, genetic analysis and more performed in the comfort serenity and relaxation of your private room. Your personal Chaum physician will guide you in the customization of your Chaum experience. Every therapy, every treatment, even every meal is custom designed for you, based on your personal diagnostic profile.

Gain the power to age beautifully through Chaum Life Center's continuous cycle of medical services, such as Medical Screening, Grey Zone Care, Healthcare Management and Cell Therapy.

### NK Cell Activity Test (15min)

As your body is exposed to the generation of many cancer cells and various infectious diseases even in a day, immune cells are playing a role of protecting your body from this risk. Those immune cells' activity, in other words, the level of their strength or weakness (immunity) is very important in preventing and treating diseases. If you can keep your immunity high, you can easily prevent and treat not only fearful cancers but also various infectious diseases.

₩165,000

### UBI Cell Photon Therapy (30min)

The UBI procedure involves inserting a small catheter (similar to giving blood) into a vein in the forearm. A small amount of blood is removed with sterile technique; approximately 50~80cc. The blood passes through a flat quartz cuvette, is irradiated with ultraviolet light in a closed, airtight, sterile circuit and returned to the blood stream. The entire procedure takes about 30 minutes.

₩750,000

### EECP (30min)

EECP(Enhanced External Counter Pulsation) Therapy works by increasing the blood and oxygen supply to the heart muscle and decreasing the amount of work the heart has to do to pump blood to the rest of the body. While the heart is at rest, the treatment cuffs inflate from the calves to the thighs to the buttocks, increasing the blood supply to the arteries feeding the heart muscle. Just before the next heart beat, all the cuffs deflate at the same time, which decreases the amount of work the heart has to do.

## Food Allergy Test (15min)

Several factors – lifestyle, disease, food allergies – can bog down the metabolism keep it from performing optimally. Examination for immune reaction to food, test for measuring organic acid metabolites in the urine, tissue-mineral analysis, and thorough assessment of nutritional status(Amino Acid, Fatty Acid)

## IVNT (60min/90min/120min)

Intravenous Nutrient Therapy (IVNT) is the number one anti-aging treatment. IVNT works by literally forcing the vitamins, minerals, amino acids, and other natural therapeutic substances into the cells by delivering them directly into the bloodstream bypassing the gastrointestinal tract.

## Personalized Diet and Recipe (1month)

The offered recipe is well balanced and planned to use every prescribed ingredient containing nutrients that your body needs. The highly individualized custom food therapy program at Chaum quickly identifies and corrects any week links in the metabolic chain.

# Evercell Skin Care

Cham Evercell Skin Care Center brings high beauty technology to help maintain your youth and beauty.

## Evercell Skin care Program

One of the largest stem cell research facilities in the world is the CHA Stem Cell Institute. In their experiments they discovered a serum that is related to the stem cell process. This stem cell media showed remarkable effects in repairing damaged skin, reducing the appearance of wrinkles, increasing suppleness, improving elasticity, and brightening skin tone. Combined with cutting edge therapies that gently introduce the serum to your skin, the results are almost miraculous.

## Evercell Skin Care

Cham Evercell Skin Care Center brings high beauty technology to help maintain your youth and beauty.

### FMS Face Lifting Skin Care (90min)

It starts with a series of vigorous massages designed to relax the scalp and the neck as well as to drain the lymph nodes. The therapy itself involves the application of coated, charged wands that lift various facial muscles to provide a firmer, more contoured appearance.

### Stem Cell Micro-Needling Therapy (60min)

Make your skin healthy by stem cell micro-needling therapy which helps absorption of stem cell culture fluid. Using very tiny needles, it gently inspire cell regeneration and collagen production in the cells of the face. Pores will be reduced in size and pockmarks and acne scars become far less prominent.

### Premium Repagen Care (90min)

Repagen helps reduce small wrinkles around the face by activating and cleansing the waste of your skin inside. It improves skin textures, pores, and fine wrinkles. According to the test results, 35.12% of people say that Repagen helps wrinkle improvement, and 30.95% of people say that their face become much more moisturized.

# Esthetic center

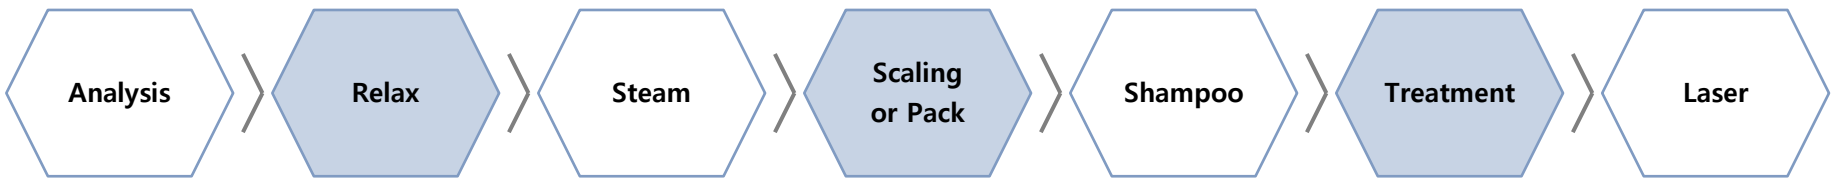

## HairSpa

Therapeutic cuisine based on individual's physical constitution.

# Food & Tea Therapy

"**Les Trois**" offers therapeutic cuisine, inspired from Mediterranean Diet, always uses top quality of Korean ingredients. The restaurant serves Bespoke Dining, which is prepared based on the recommendation from Doctors, Chefs, Nutritionists with the best seasonal ingredient, to prevent and treat illness with healthy diet and lifestyle. You can also savour variety of healthy dishes at 'Retroa' with its luxurious service in the sophisticate atmosphere.

"**CHA IN CHA**" is a space to enjoy various types suggested tea and prescribe a certain type of tea according to one's constitution and physical condition. Savouring a cup of tea in a comfortable surrounding helps to increase one's immune system and prevent illness. CHA IN CHA's key features over 50 types of high-quality tea, carefully selected and harvested from mountain regions.

# Cell Banking Program

Chaum offers an integrated stem cell storage solution which stores and utilizes patient's young and healthy stem cells and immune cells to prevent various diseases in the future.

## Why should we store stem cells and immune cells?

- The Commercialization of Cell Therapy  
Treatments for incurable diseases using stem cells and immune cells are being studied all over the world, and if cell therapy products are commercialized, cells that were stored in a healthy state can be used to treat various diseases.
- Cell Aging  
As a result of aging, the number of cells and cell activity in our body reduce. Therefore, it is important to store your cells when they are healthy.
- No Worry of Immune Rejection of Side Effects  
The human body contains its own HLA, which triggers an immune rejection when the cells of another body enter. If you use your own cells, however, there will be no worry of immune rejection or any side effects.
- A Lifelong Health Insurance  
Since the occurrence of a disease is unpredictable, your cells can be used in multiple ways if you store them beforehand in the case of future disease.

## Cell Banking Program and Price

- Adipose Derived Stem Cell Banking

20 years. ₩ 9,000,000

- Natural Killer Cell (Immune Cell) Banking
