SAMSUNG MEDICAL CENTER

ENGLISH

**SAMSUNG
MEDICAL CENTER**

The Top Medical Complex in Korea

Samsung Medical Center(SMC) is truly the most renowned hospital in Korea. Since its establishment in 1994, SMC has pursued great medical advancement in all areas including treatment, research, education and medical service. In addition, Samsung Medical Center was officially appointed as a medical evacuation hospital for the White House of the United States in 1996 and established the largest cancer center in Asia in 2008.

Through continuous change and innovation, Samsung Medical Center will spare no effort in achieving its goal to be a leading global hospital while contributing to the welfare of people in Korea and the world.

March 2008
Established the Comprehensive Cancer Center

April 1996
Officially appointed as a medical evacuation hospital for the White House of the United States

November 1994
Established Samsung Medical Center

Independent Operation of Samsung Comprehensive Cancer Center

The Center, which is specialized in cancer treatment, was opened in January 2008 with 11 floors aboveground and 8 underground floors as well as 700 beds. Here, the top-level medical team in Asia provides highest-quality medical treatment and services.

• Multidisciplinary Care

Heart Vascular Stroke Institute Focusing on Treatment of Severe Diseases

The institute is organized into the Cardiac Center, Stroke Center, Vascular Center, Imaging Center, and Rehabilitation Center. We moved away from the traditional department model, instead creating an integrated system that brings together internal medicine, general surgery, radiology, intensive care, and pediatrics.

• Minimally Invasive Treatment

Operation of the International Patient Center

Samsung Medical Center is a leading and well-known hospital with the largest number of international patients in Korea. At present, approximately 100 patients from various countries are visiting the International Health Care Center daily.

A Medical Team with Global Competency

With proven foreign language proficiency, the Center's medical team has vast experiences in the treatment of various foreign patients. Samsung Medical Center outstands itself with a medical system optimized for the treatment of international patients through a 24-hour patient standby service and others.

Global Coordinator and Concierge Service

By coordinating interpretation services including English, Chinese, Russian, Arabic, Mongolian, etc. and other necessary services for a patient to stay in Korea such as transportation as well as accommodation, Samsung Medical Center aims to minimize a patient's discomfort during a treatment period in Korea.

Innovative Radiation Therapy

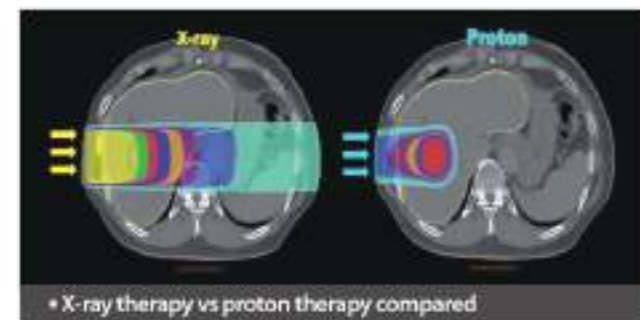

Compared to the existing radiation therapy using X-ray and gamma ray, this is an innovative and advanced treatment method that can lower the possibility of side effects and secondary cancer. By concentrating energy to the specific cancer tissues, we minimize the amount of radiation irradiated on normal tissues.

World-Class Equipment

The SMC equipment installed in 2015 is the most up-to-date instrument among that of other proton therapy centers throughout the world. It allows our patient to receive accurate and effective treatments with the Line Scanning and MLC technology.

Comprehensive Care Service

The SMC Proton Therapy Center also provides psychological care which makes an use of music and art as well as systematic symptom care to promote a patient's quick return to his/her normal and daily life.

Largest Center that Provides Comfortable Health Examinations

Samsung Medical Center operates the largest center of its kind with its space of approximately 7,300 square meters. With it, SMC provides a pleasant atmosphere for its patients with its specialized examination rooms such as a female examination.

Operation of an Overnight Unit within the Health Medical Center

Here in Samsung Medical Center, you can have health examinations in a luxurious and comfortable overnight room through best care and services provided by exclusive doctors and nurses.

Best Global Customer Service

A professional customer service program optimized for people's lifestyle can be observed for every customer. It provides the 1 to 1 guides and tailored services from a designated coordinator (nurse) to maximize a patient's satisfaction and convenience.
